QUICK START

STEP 1 INSTALL

Using the BFHAHB harness, install the BFHA interface into your vehicle. Contact Scosche Tech Support for your specific vehicle disassembly.

STEP 2 POWER THE MODULE

With the unit installed, turn the ignition key to the on position to place the Bluefusion module into pairing mode. Press your radios designated XM button to enter the XM (Bluefusion) source. From the XM source press the preset number 6 button, the screen displays "Bluefusion" when ready.

STEP 3 PAIR YOUR CELLULAR PHONE

Set your cellular phone into pairing mode and search for a new Bluetooth device (See your phone's owners manual for instructions). Once your cellular phone has searched for a new device, select "BLUEFUSION" from the list of devices found. If prompted for a pass code enter "0000".

STEP 4 NAVIGATE AND ENJOY

Once the two devices have connected and paired, you will be able to scroll through the menu functions of the BFHA. (See page 2-4 for Bluefusion operation).

IMPORTANT!

INSTALLATION OVERVIEW

PAIRING YOUR MOBILE PHONE

1. Turn the key to the on position (II) to place Bluefusion into pairing mode.
2. Press the appropriate button to get to your XM source, then press and hold the preset number 6 to enter Bluefusion, screen displays "BLUEFUSION".
3. On your cellular phone, enter your Bluetooth menu and make your cellular phone search for a new bluetooth device. The device name will be "BLUEFUSION" and if you are prompted for a pass code enter "0000".
4. When the two devices are paired to each other, be sure to set the Bluefusion as a trusted device on your cellular phone.

NOTE: When the ignition is turned off the call will automatically transfer to the headset.

NOTE: When a phone call is active and you are re-entering the vehicle, the call will not automatically transfer to Bluefusion. Active calls will remain on the cell phone until the next active phone call.

These notes are assuming the cellular phone's bluetooth feature is set to "ON".

SWITCHING RADIO SOURCES

While using other sources other than XM (Bluefusion) the interface will automatically switch to the XM source when you have an incoming phone call. The radio switches through the sources to find the XM source on the radio, some audio may bleed through while switching sources.

When a phone call is ended your radio will not automatically switch back to the original source you were previously on, this feature only works when previously on XM source. At this time we recommend switching back to the original source you were previously on.

RADIO OPERATION

RADIO CONTROLS MAY VARY.

There are different buttons used for each of the individual radios.
Please read and understand this entire manual before operating the interface.

THIS CHART IS TO BE USED FOR ALL RADIO STYLES BELOW.

P = PRESET NUMBER

P	FUNCTION
1	SELECT/ ANSWER
2	ACTIVATE VOICE DIAL
4	END/ CANCEL/ IGNORE
6	TOGGLE XM/ BLUEFUSION

PRESET NUMBERS FUNCTION THE SAME FOR RADIOS LISTED BELOW.

RADIO STYLE #1

RADIO STYLE #2

RADIO STYLE #3

TRANSMITTING MUSIC USING BLUETOOTH

IN ORDER FOR THIS FUNCTION TO WORK A CELLULAR PHONE MUST BE PAIRED AND CONNECTED

When listening to audio from a stereo Bluetooth receiver the audio will be interrupted (not paused) when a phone call comes in.

Controlling your stereo Bluetooth transmitter via AVRCP:
 Play/ Pause – Not functional through the radio control.
(Use the controls on your external device).

Track Forward – Press the Seek Forward button.

Track Back – Press the Seek Back button.

USING THE STEERING WHEEL CONTROLS

USE THE CHART BELOW FOR SW#1 ONLY. (SEE ILLU BELOW FOR SW#2)

ANSWER/2ND CALL	PRESS THE CHANNEL BUTTON. (SEE ILLU BELOW FOR SW#2)
END/IGNORE	PRESS AND HOLD THE CHANNEL BUTTON. (SEE ILLU BELOW FOR SW#2)
TRACK FOWARD	PRESS THE CHANNEL BUTTON. (SEE ILLU BELOW FOR SW#2)
TRACK BACK	PRESS AND HOLD THE CHANNEL BUTTON. (SEE ILLU BELOW FOR SW#2)

SW#1 (USE CHART ABOVE)

SW#2 (USE ILLU BELOW)

The **MODE** button will always route your conversation back to the cellular phone, also known as privacy mode (ex. when exiting the vehicle).

TROUBLE SHOOTING

NO AVRCP CONTROL	Verify that the paired device supports AVRCP functionality.
RANGE ISSUE	Bluetooth standard range maxing out at 30 feet, may vary due to environment.
DEVICE NOT FOUND	Delete all previous pairing attempts and try again.
BAD CALL QUALITY	Make sure the cellular is within range of the module (30ft.). Make sure the signal reception of the cellular phone is strong.
NO SOUND	Make sure the module is on and paired to transmitting device. Make sure the volume is correct, check both the radio and the transmitting device, and other items within range.
AUDIO DROP OUTS	Make sure the transmitting device is at a good battery state. If the item is on low battery, please recharge.

NOTE: Due to every phone having different software and functionality features, many phones may work different with the Bluetooth module of the BFHA. We recommend contacting the Scosche Technical Support at 1-800-621-3695 Ex.3 with any common or reoccurring issues.

LIMITED WARRANTY

Scosche Industries Inc. warrants this product to be free from defects in material and workmanship for a period of 90 days from purchase. This Scosche product is sold with the understanding that the purchaser has independently determined the suitability of this product. This warranty is offered to the original purchaser of the product only. This warranty does not cover the product if physically damaged, subject to negligence or misuse, abuse, alteration, accident, or an act of GOD. This warranty does not apply to product which has water or physically damaged by accident or which has been misused, disassembled or altered.

The original dated sales slip or proof of purchase will establish warranty eligibility. If the product should prove defective within the warranty period, return the product with proof of purchase to Scosche Industries Inc. Scosche, at its option, will replace or repair the product free of charge and return the product postage paid. In no event shall Scosche Industries, Inc. be responsible for claims beyond the replacement value of the defective product, or in any way be liable or responsible for consequential or incidental damages. No express warranties and no implied warranties, whether for fitness or any particular use or otherwise, except as set forth above (which is made expressly in lieu of all other warranties) shall apply to products sold by Scosche. Scosche Industries cannot be held responsible for discrepancies/inconsistencies that may occur due to automotive manufacturing changes or option.

INSTALLATION OVERVIEW

SCOSCHE

BFHAH

INSTALLATION

Tech Tip: When mounting the BFHA make sure to be clear of all moving mechanical device that may hit or damage the interface. Keep away from any hot surface areas like heater ducts direct sun light and metal surface areas that have the potential of getting hot.

BFHA INTERFACE INSTALLATION

1. Remove radio
2. Insert Scosche "T" harness into radio and factory harness
3. locate Steering Wheel Control information from the list on reverse page
4. Use supplied T-Tap to tap SWC wire then connect to appropriate T-harness SWC wire.
5. If SWC wire is not present, insert supplied terminated cable into the the SWC wire's location then connect to appropriate T-harness SWC wire.
6. Plug 24pin plug into Bluefusion Interface.

BFHA MICROPHONE INSTALLATION

1. Attach the microphone on the headliner above the rear view mirror.
2. Route the microphone cable through the headliner and "A" pillar to the interface location.
3. Plug in the 3-pin molex connector to the pigtail on the Scosche "T" harness.

2004-08	ACURA	TSX	A
2007-08	ACURA	MDX	C
2005-08	ACURA	RL	A

NOTE: WIRE COLORS MAY VARY FROM THOSE LISTED

1) Determine from the list which connector drawing to reference. In this case we are in an 09 Accord which is listed as connector B.

2) Find the Steering Wheel Control pin location shown in the connector drawing (as written in the connector drawing; all views are from wire side of connector) As shown, SWC wire in connector B is pin 16.

3) If this pin location is already populated simply T-tap and connect to the brown wire marked "SWC" (purple wire marked "Pilot SWC" in case of the Pilot) and skip to step 7.

4) If the pin location IS NOT populated then reference the connector drawing to determine which of the supplied pinned wires to use. In this case we are going to use pin B with the orange wire.

5) Lift the retainer clip on the connector and insert the supplied pinned wire into the pin location determined in step 2 (note the orientation to the connector's clip listed in the pin drawing).

6) Connect the supplied pinned wire (which is now inserted into the connector) to the brown wire marked "SWC" (purple wire marked "Pilot SWC" in case of the Pilot).

7) You are now ready to plug in the T-Harness assembly and the BlueFusion interface module.

8) To test, start vehicle and follow Quick Start Guide to pair your phone. Once phone is paired, switch radio to FM source and make an outgoing call. If radio switches sources to BlueFusion all connections are correct.
