

HDMI TO COMPOSITE CONVERSION CABLE FOR IPHONE, IPAD AND SAMSUNG DEVICES

VCIP5

WORKS ON:

iPhone and iPad with Lightning connectors Only.

Samsung Stratosphere II, S III, S 4, S 4 Active, Mega, Note II and Note 3, as well as Samsung Galaxy S 5 models. Also compatible with most MHL enabled devices.

Our new VCIP5 cable allows you to connect your iPhone to any composite input, when using the Apple Lightning to HDMI adaptor (Sold separately)

When using our VCIP5 you will be able to mirror (one way) the display of your iPhone to your video screen. And all applications that allow you to rotate will fill the screen on the radio display.

The included USB connector is there to provide 5V for the conversion of the Digital signal to Analog. The USB does not transfer any data nor charge your phone.

NOTE:

If no Video or Audio is present, please connect the USB plug to a 5V source.

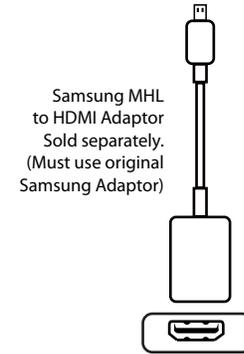

iPhone & iPad are a registered trademark of Apple Inc. in the United States and other countries. Samsung and their model numbers are trademarks of Samsung in the United States or other countries.

Connects to Samsung Devices

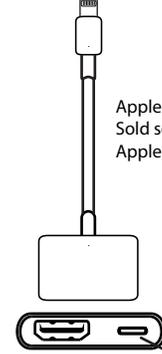

Connects to iPhone 5/5c/5s/6/6s/6s+ iPad
