

EXCEEDS AMERICAN WIRE GAUGE STANDARDS

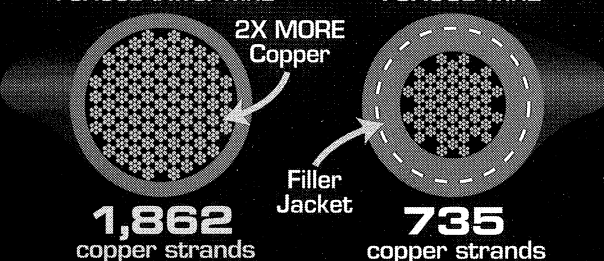

Rockford Fosgate accessories are designed and engineered in accordance with the AWG or American Wire Gauge specification - which is *THE STANDARD* method of denoting wire diameter.

Don't be fooled by competitors that use cost-saving foreign or no specifications at all - using thick jackets to hide wires containing 25-50% less copper.

Illustrations for graphical representation only

MORE COPPER... MORE POWER... BETTER SOUND!

OURS 4 GAUGE (AWG) WIRE **VS.** **THEIRS** 4 GAUGE WIRE

1,862
copper strands
Our true 4 Gauge (AWG) wire has 2X more copper and a jacket with no filler to deliver **MAXIMUM** power

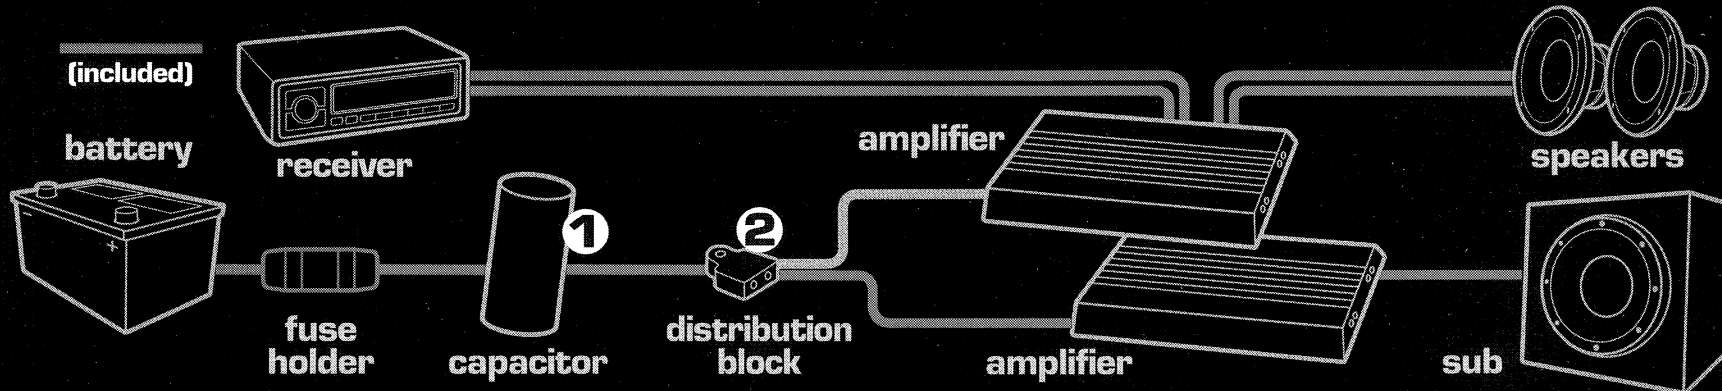

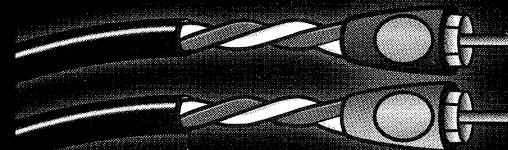

735
copper strands
Their 4 Gauge wire has 60% **LESS COPPER** and a filler jacket to deliver **MINIMAL** power

CLEANER SIGNAL... LESS INTERFERENCE... BETTER SOUND!

TWISTED PAIR

Helps **reduce** noise for **ENHANCED SOUND QUALITY!**

Each channel is twisted, alternating the positive and negative conductors.
